## Summary

Full-Stack MERN Developer with 1+ years of freelance experience building scalable web applications using React.js, Node.js, JavaScript (ES6+), Express.js, MongoDB, Redux Toolkit, and REST APIs. Experienced in developing business applications with JWT authentication, workflow automation, and backend API testing using Jest and Supertest.

## Work Experience

### Freelance Full Stack Developer

2022 – Present

Self-Employed

- Built and deployed full-stack MERN applications focused on business workflows, dashboards, and secure authentication.
- Developed scalable frontend and backend modules using React.js, Node.js, Express.js, MongoDB, and REST APIs.
- Designed application architecture, implemented workflow automation, and optimized API performance.

### Frontend Developer - Intern

July 2021 – Jan 2022

Kashmiri Geeks Pvt. Ltd.

Remote - India

- Developed responsive frontend features using React.js, JavaScript, and Redux.
- Integrated REST APIs and implemented modular UI components for scalable development.
- Collaborated with backend developers and designers to deliver responsive user experiences.

## Education

### Brainware University

Aug 2018 – Aug 2021

Master of Computer Application

CGPA - 7.38

## Technical Skills

|                     |                                                                                     |
|---------------------|-------------------------------------------------------------------------------------|
| Frontend & UI       | React.js, React Native, Redux Toolkit, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS |
| Backend             | Node.js, Express.js, REST APIs, Middleware Design, JWT Auth, Google OAuth 2.0       |
| Database & Security | MongoDB (NoSQL), Redis, Zod, bcrypt                                                 |
| Tools & DevOps      | Git/GitHub, Docker, Postman, Jest, Supertest, Render, Netlify, CI/CD, Vite          |

## Projects

### Health AI [\[GitHub\]](#) [\[Live\]](#) | React.js, Node.js, Express.js, Groq Llama 3.1, STT, TTS

- Built an AI health screening platform integrating Groq Llama 3.1 with STT and TTS services.
- Developed context-aware conversational workflows using LLM integration, conversation history, and response generation.
- Implemented REST APIs connecting STT, LLM, and TTS services, with AI report generation and defensive error handling.
- Designed reliable AI workflows with asynchronous processing, error recovery, and conversation reset functionality.

### AI Generator CMS [\[GitHub\]](#) [\[Live\]](#) | React.js, Node.js, Gemini API, HuggingFace API, Redis

- Built a full-stack AI content platform integrating Google Gemini and Hugging Face APIs for automated content generation and AI image creation.
- Architected secure REST APIs with JWT authentication, MongoDB persistence, and Cloudinary integration for scalable storage of generated assets.
- Implemented Redis caching to optimize image retrieval performance, reducing latency and redundant external API calls.

### TalentFlow – HRMS [\[GitHub\]](#) [\[Live\]](#) | React.js, Node.js, Express.js, MongoDB, Redux Toolkit

- Developed HRMS workflows with employee attendance, leave management, and role-based access control.
- Automated attendance processing using node-cron with defensive handling for edge cases and failures.
- Integrated Google OAuth 2.0 and JWT authentication for secure login and protected multi-role access.
- Implemented scalable frontend state management using Redux Toolkit and reusable React components for maintainable data flow.
