Summary

Full-Stack Developer focused on building scalable business applications using React, Node.js, JavaScript, MongoDB, SQL, Redux Toolkit, and REST APIs. Experienced in developing production-style platforms including inventory management, HRMS, and job portal systems with secure backend architecture, workflow automation, JWT authentication, and tested backend services using Jest/Supertest.

Work Experience

Freelance Full Stack Developer

2022 – Present

Self-Employed

- Built and deployed full-stack MERN applications focused on business workflows, dashboard systems, and secure authentication.
- Developed scalable frontend and backend modules while strengthening expertise in REST APIs, Redux Toolkit, and MongoDB.
- Worked on independent product development, application architecture, and workflow automation projects.

Frontend Developer - Intern

July 2021 – Jan 2022

Kashmiri Geeks Pvt. Ltd.

Remote - India

- Developed responsive frontend features using React.js, JavaScript, and Redux.
- Integrated REST APIs and implemented modular UI components for scalable development.
- Collaborated with backend developers and designers to deliver responsive user experiences.

Customer Support Executive

Feb 2023 – Nov 2023

Fusion Bpo Services

Remote - India

- Managed high-volume customer issue resolution and strengthened problem-solving skills.

Education

Brainware University

Aug 2018 – Aug 2021

Master of Computer Application

CGPA - 7.38

Technical Skills

Frontend & UI	React.js, Redux Toolkit, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Framer Motion,
Backend	Node.js, Express.js, REST APIs, MVC Architecture, Middleware Design, JWT Authentication
Database & Security	MongoDB, SQL, Zod Validation, bcrypt, Error Handling, Secure API Design
Tools & DevOps	Git/GitHub, Postman, Jest, Supertest, Render, Netlify, CI/CD, Vite

Projects

TalentFlow – HRMS [\[GitHub\]](#) [\[Live\]](#) | React.js, Node.js, Express.js, MongoDB, Redux Toolkit

- Developed HRMS workflows with employee attendance, leave management, and role-based access control.
- Automated attendance processing using node-cron with defensive handling for edge cases and failures.
- Built secure JWT authentication and protected REST APIs for multi-role system access.
- Optimized frontend state management using Redux Toolkit for scalable data flow and maintainability.

PixVault - Gallery & Album Management [\[GitHub\]](#) [\[Live\]](#) | MERN Stack, Cloudinary

- Built a scalable image management platform supporting album creation, image uploads, secure sharing, and media organization workflows.
- Designed secure REST APIs with JWT authentication, role-based access control, Zod validation, and protected resource management.
- Integrated Cloudinary, Multer, and Redux Toolkit to optimize media storage, state management, and overall user experience.

Inventory & Billing Dashboard [\[GitHub\]](#) [\[Live\]](#) | React.js, Node.js, Express.js, MongoDB, Chart.js

- Architected inventory and billing workflows with stock tracking and low-stock alert management.
- Developed responsive admin dashboards with analytics visualization for sales and revenue monitoring.
- Implemented reusable modular components and optimized Redux state handling for performance.
- Tested backend APIs using Jest and Supertest to improve reliability and reduce integration issues.
